

# SMART LOCATE

Vehicle Tracking System

PEACE OF MIND ON YOUR  
FINGERTIPS

## SMART PRODUCTS

SmartLocate offers customers an unrivalled blend of technological advancement, strategic input & in-depth field knowledge to suit lifestyle & budget requirements.

### YOU CAN CHOOSE FROM THE FOLLOWING:

#### SMARTLOCATE APP

Our vehicle tracking solutions centre around the SmartLocate app: an ideal partner for those handling businesses, supervising family travel and monitoring drivers. SmartLocate empowers customers to track, monitor and enhance their supervisory capabilities through a user friendly app that can be accessed on a smartphone, tablet, or computer.

#### REAL TIME DASHBOARD

SmartLocate does the hard work of analysing your data and generating simple reports on a wide range of heads which include but are not limited to: locations, travel history, fuel efficiency, geo-fencing alerts and driving style analysis to improve vehicle operations and utilization.

#### FUEL EFFICIENCIES

An automated fuel management system gives fleet organizations a much higher level of accountability that can yield up to 15% in fuel consumption savings and 10% - 20% in the reduction of 'shrinkage' or wasted fuel. SmartLocate offers Fuel Optimisation Solutions through the FUEL LEVEL SENSOR which can monitor actual fuel level, fuel filling quantity, fuel consumption and theft /stolen reports.

It features:

- 1) Configurable thermal correction
- 2) Digital self diagnostics to counter check data
- 3) Ensuring tamper-proofing by sealing opening
- 4) Fuel Theft Alert
- 5) Fuel Usage Pattern Report
- 6) Fuel History Report

#### DRIVER PERFORMANCE MONITORING

Monitoring and improving driving style can save up to 15% in fuel savings and reduce risks of accident and injury. With daily reports available in software, you can now see exactly how much fuel is used, the distance traveled, routes taken and the speed with which your vehicles are being driven at. The data can help you encourage safe and economical driving behavior with family members or staff.

#### MDVR

Mobile Digital Video Recording is a facility on offer for our consumers and is one of the latest technological feats in the world of fleet management. It is ideal for managing driver behavior and mitigating risks, and also helps arbitrate post-accident blame. MDVR is a digital video recording system embedded with Wi-Fi and 3G modules that includes features such as Camera Disconnection Alerts, GPS tracking, 3G Connection and Night Vision Surveillance Camera Connectivity.

## WHO WE ARE

SmartLocate was formed in 2012 with the aim to provide reliable and effective solutions in the field of vehicle and asset tracking across Pakistan. Our parent Company's vast experience in the field of risk management led us to identify gaps of technologically superior services in vehicle management and fleet security and led to the creation of SmartLocate.

Fleet managers and individuals from many sectors and walks of life benefit from the tracking services provided by SmartLocate. A one-stop solution that empowers our customers through user-friendly and well integrated technology. We ensured that user's ease is paramount. Fluency of software usage, agility in technical support, seamlessness of data update – these are areas that Smart Locate has successfully integrated in its offering.
