

TEST International

A Tested Name for Quality & Reliability

Our diversity, experience and ambition to reach beyond frontiers is what makes us stand out

About Us

TEST International is a global defense, aviation, security and hi-tech company providing products and services to Corporate and Government clients around the world since 1992. Building upon our legacy specializing as a full-service procurement and logistics contractor, our abilities are recognized by militaries, law enforcement agencies and private defense organizations for successful fulfillment spanning land, air and naval forces, as well as security, hydro-met, advanced electronics, information technology, consultancy and support.

Strategically headquartered in Rawalpindi, Pakistan, TEST International is able to leverage the vast personal expertise of our management team and deep industry contacts to effectively service the entire region and in particular the Middle East and Pakistan. As such we regularly work with all branches of the Pakistani Military and affiliate organizations on behalf of numerous international manufacturers and clients. Our highly qualified team streamlines the entire life cycle—manufacturers' products are promoted, marketed, tested, evaluated, procured and implemented with end users on time and with a high rate of reorder. In-country representation and domain proficiency allow us to help clients navigate the difficulties posed by currency risk, cultural issues, language barrier, and any logistical and regulatory complications.

TEST International is also a preferred bridge to International Military Markets able to source and deliver weapons, ammunition and weapon systems globally from OEMs and from our significant access to local military surplus weapons inventories. Our seamless operations offer customers a single-point of contact capable of rapidly locating and managing multiple requirements while proactive strong relations and a high volume of business ensures preferential product allocation and the best possible pricing.

Test Internationals' Security Division provides clients with the support and services required to operate effectively in hostile environments. In particular these extend from threat and risk assessments to specialized equipment including security vehicles and surveillance systems and capabilities across awareness, close protection disciplines, rapid response and high-risk environment training.

TEST International also aims to provide hydrological and meteorological solutions to its clients. Technologies implementation can make it possible to cope with the challenges of climate change, water scarcity and environmental degradation. To provide a wide range of hi-tech hydro-met, information technology and communication products and services is our ultimate target.

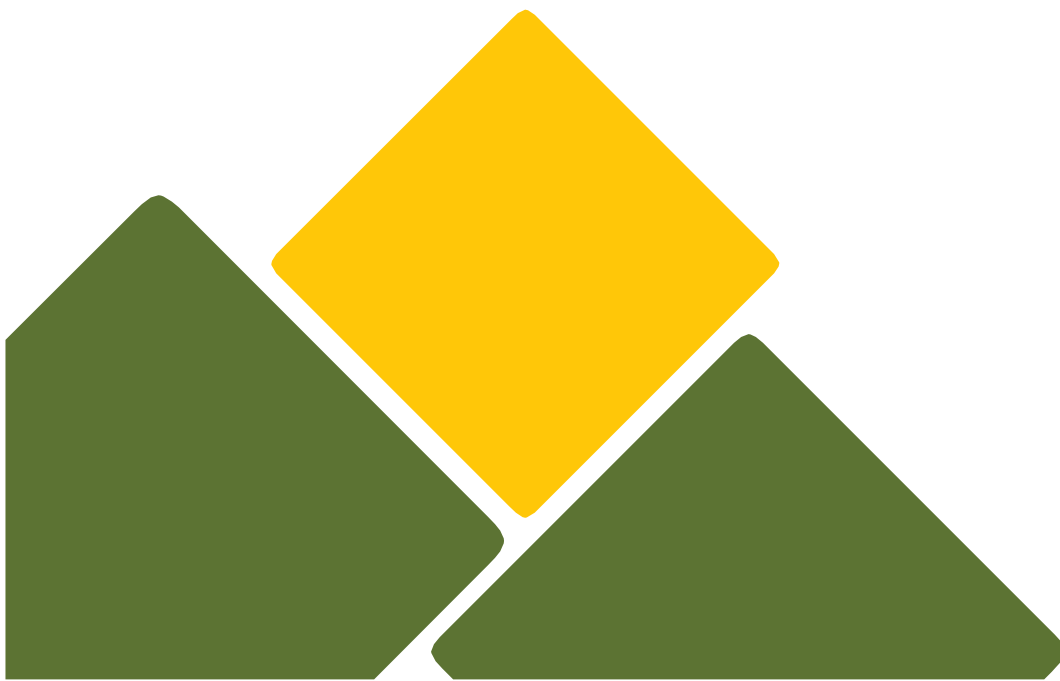

Defence Contracting

Global reach - Vetted Sourcing & Procurement - World Class support

TEST International's Defense division has over two decades of experience successfully bridging the needs and requirements of the International Military Markets, OEMs and MIL/LE End Users. No matter the complexity of the request, our procurement and sourcing teams have experience to ensure the efficient acquisition, sale, support and delivery of products and equipment from and to every corner of the globe.

With capabilities covering all military services (army, navy, air force, coast guard, special forces) and various platforms, we are committed to providing the highest quality materials at the best value in our markets. The TEST International value proposition extends from insight into and visibility of valuable end user budgetary information and forecasts, a proven track record as a trusted supplier on behalf of leading OEMs within the industry to expertise in the variety of complex international terms and conditions including bid/performance sureties, reliability and capability testing requirements and all modes of international shipment. Our Defense division can assist you with all your sourcing & procurement needs—your single point of contact at one company.

Security Services

Security & Surveillance Systems - Risk Assessments - Skilled Protective Services

Successfully operating in difficult environments requires personnel and equipment that can meet the challenge. TEST Internationals' Security division is a leading provider of state of the art security and surveillance equipment to various defense organizations, law enforcement agencies and private companies, as well as the training required to operate it effectively.

Under the same umbrella TEST operates a Security and Protection Agency certified and authorized by the Government of Pakistan. All of our security professionals have formal training and extensive experience and our domain proficiency extends from risk assessments through protective services. We specialize in video surveillance, scanning and access control and tracking services including analog/IP/CCTV, RFID/biometric access control, detection/scanning/first line of defense control, panic/intrusion alarms, as well as vehicle/personal tracking and security vehicles. TEST International ensures our clients sensible, cost-effective measures to mitigate risk.

Technology Services

Hydro-met & ICT Solutions - Challenges - Skilled Safeguarding Services

Hydro-met

TEST International targets the problems of water scarcity, environmental degradation, and water-related natural hazards arising from the expansion of the human imprint on Earth pose enormous challenges to the way we conduct hydrologic science. Flood forecasting, water quality testing, water discharge measurement are necessary steps to manage water for human lives and properties.

Weather information is important for farmers' day to day decisions for the four areas of crop growth/irrigation, Fertilizer Timing and Delivery, Pest and Disease Control and Field Workability and these are fundamentally affected impacted by weather.

There is an unprecedented opportunity to utilize our technological and theoretical advances in measurement, modeling, and visualization of both variability and change in our world, these being prerequisites for detecting, interpreting, predicting, and managing evolving hydrologic systems.

TEST International has a wide range of products to provide solutions to its customers. These products include data loggers, different types of sensors (level sensor, velocity sensor, tipping bucket/ rain gauge, temperature and humidity sensors) and management software.

Information and Communication Technology

TEST International handles callers' requests for ICT services more quickly and efficiently. We design and implement solutions for our client. We have a wide range of quality products and technical expertise to provide information and communication services even in a very complex environment.

Our Association

TEST International is or has been in working association with various international companies. Some of them are listed as follows:

1.	CMP / Chemring Ord.	USA	Mike Qusenberry, Paul Evans
2.	Revision Eyewear	USA	Alex Hooper
3.	Nammo Talley Inc.	USA	Dee Swartz, Brig Gen (Retd) Ronald Johnson
4.	US Ordnance	USA	Steve Helzer
5.	Tradeways	USA	Chris Carpita, Joe Gorski
6.	EXPAL	USA	Steve Dart
7.	NATL	USA	William Gifford
8.	S4 Industries	USA	Robert Grimmer
9.	I&VC	USA	Geroge Gary
10.	ADS	USA	Geroge L. Adamakos
11.	Profense	USA	Christopher J. Myers
12.	Alaska Structures	USA	Jimmy C. White
13.	RP Adv. Mobile Systems	USA	Lou Driever
14.	Patriot3 Inc.	USA	Charlie P. Fuqua
15.	Wilcox Ind Corp.	USA	Travis Mitchell
16.	Cirrus Aircraft	USA	David Dash Wilmot
17.	SAVOX	UK	Brian Jeffrey
18.	Standard Brands Ltd	UK	Terry Coates
19.	Thermoteknix	UK	Daniele Di Luna
20.	Heliworks	UK	Marc Anton Corominas
21.	Aselsan	Turkey	Tugrul Ozkan
22.	Yakupoglu	Turkey	Lvevent
23.	MKEK	Turkey	Akif Akhgul
24.	TAI	Turkey	Bulent Batmaca
25.	Roketsan	Turkey	Hakan Kalabar
26.	SAPURA	Malaysia	Wan, Shah Salman
27.	PRONAL	Malaysia	Sylvain Ehrhart
28.	Bristol Aerospace	Canada	Ken Kohut
29.	EOMAX Corp.	Canada	Ken Smart
30.	UDC	Ukraine	Mattew Herring, Denys Danko
31.	Polytronic	Switzerland	Fredi Koller
32.	Bertin Technologies	France	Cecile Maria
33.	Protypa	Czech Republic	Zdenok Hook
34.	EDH	South Africa	Amos Brunner
35.	Aeromaritime	Germany	Werning Oliver
36.	Arbasco	KSA	Emad Ghobar
37.	AAL Group Ltd	UAE	Irina Akifieva
